InTech™ Index 1954-1979

AN ISA PUBLICATION — INSTRUMENTATION TECHNOLOGY

Instrument Society of America
P.O. Box 12277
Research Triangle Park, NC 27709

The index was prepared by ICON/Information Concepts, Inc., Philadelphia, PA 19104. Input material was derived from yearly indices of the magazine. Programming to create the index was done by Roger J. Cooper; data entry was by Suzanne Booth.

HOW TO USE THESE INDICES

This Index consists of three sections. The Cumulative Subject Index is an alphabetical listing of topics. The Cumulative Author Index lists all individuals credited with published material. The Chronological Listing of Titles gives the titles of all articles in sequence.

Each entry in the subject and author indices includes the month, year and page number. For example, the reference 12/69 43 refers to the December 1969 issue, page 43.

PREFACE

The creation of this cumulative index was motivated by several forces, none probably more dominant than another. When regarded in the aggregate it was felt necessary to respond to the fact that ISA's major publication had celebrated, in 1979, its 25th year of continuous monthly publication.

It has been the editorial practice to publish an Annual Index in each December issue. It was increasingly evident, however, that ISA had created a cumulative body of technical and scientific information which is impressive and should be more accessible to the technological communities we are privileged to serve.

When viewed as a practical reference tool, this document can be a useful guide for the practitioner, reference librarian and researcher.

This index is an historical record of the communication among instrumentation professionals during the last quarter of a century. It presents a striking panorama of the diversity of concerns by the professionals it represents. By tracking the developments in the "subject index," one can trace advances in theory and applications as our technologies have forged ahead.

This index also represents our contemporary concerns with readily available information transfer. It is our hope that this document will serve its many purposes and that ISA will be able to provide, on a regular basis, supplements to thie first cumulative InTech Index.

G. F. Harvey
Publisher, InTech

Chronological Listing of Titles

1954 through 1979

JANUARY 1954
Study of Process Control by Phase-Angle Loci Method . . 18
Segmental Recorders 27
Human Engineering in Power Plant Instrumentation . . . 31
Principles of Automatic Control -- Part I 40
Electronics in Instrumentation 46

FEBRUARY 1954
Instrumentation in Research and Development 10
Computer Techniques in the Instrumentation Industries . 13
An Introduction to the Resistance Wire Strain Gage . . 17
Experimental and Mathematical Techniques for
Determining Dynamic Response of Pressure Gages . . . 27
Determination of Minimum Capacities for Control
Applications 33
Principles of Automatic Control -- Part II 42

MARCH 1954
Instrumentation in Research and Development 7
Supervisory Instruments for Steam Turbines 13
High-Stability Circuitry for Resistance Strain Gages . 18
Application of Electronic Process Control to Oil
Refineries 22
Continuous Recording Oximeters with Clinical
Applications 28
Instrumentation of Automatic Transmissions 32
Dynamic Analysis of Plate Heat Exchange System 37
A Three-Component Vibration Meter 44
A Pneumatic or Hydraulic Pressure Testing Unit 45
Principles of Automatic Control -- Part III 47

APRIL 1954
Instrumentation and Science 7
Steam Power Plant 13
Camera Design for Instrumentation in Radiomicrography . 23
Instrumentation for Statistical Quality Control 29
The Manufacturer's Viewpoint on Instrument Calibration 32
Pneumatic Transmission Lines 35
The Electronic System Reliability Problems 48

MAY 1954
Sample Handling Considerations with Continuous
Infrared Analyzers 12
Mechanical Dissociation of Fluids and Dielectric
Constant Measurement 13
A Calibrator for Vibration Pick-ups 17
A Device for Simultaneous Comparison of Variable EEG
Brain Patterns 20
Angular Position Indication by a Light-Weight
Variable Reluctance Pick-up 21
Practical Considerations in Designing ac and dc Bridges 29
Reducing Pulsation for Metering 43

JUNE 1954
Specific Gravity Measurement of Starches 13
Liquid Metal Magnetic Flowmeters 15
Steam Turbine Supervisory Instruments 24
Sampling Systems for Plant Analyzers 29
Some Principals of Accurate Instrumentation in Vectorcardiography 32
Protective Housing for Stacked Controllers 62
Capillary Gage Tester 62

JULY 1954
A Remote Controlled Mechanical Arm 21
Standard Calibration Methods for Measuring Instruments 24
Modified Double Bridge for Dielectric Measurement . . . 28
Pneumatic Multiplying for Process Control 30

AUGUST 1954
An Introduction to Analog Computers 9
Precision and Cost in Instrumentation 15
Applications of Magnetic Recording to Seismic Exploration 18
Instrumentation for Radiochemical Processing Recovery of Iodine 21
Analysis and Design of a Spring Coupled Accelerometer . 26

SEPTEMBER 1954
Frequency Response in the Instrument Industry 157
A Progress Report on Transistors 161
The ABC's of Frequency Response 164
Test Systems for Miniature Controllers 169
Selection of Coded Signals 173

OCTOBER 1954
High Speed Data Plotting Instrument for Strain Gages . 21
Production and Measurement of Temperature Below 1 K: Application to Nuclear Polarization 25
Automatic Control of Batch and Continuous Sterilizers . 28
Applications of Newer Process Control Concepts to a Steam Generating Plant 31
Using Dynamic Analysis in Instrument Design 37
The Significance of Process Capacity, Capacitance and Resistance 40
Refrigerator Control Using a Pressure Balanced Valve . 43

NOVEMBER 1954
Progress in Data Recording 12
Why Electronic Process Control? 16
Round-Edged Orifice Plates for Measuring Viscous Liquids 20
Some Differences between Robots and Human Beings in the Process of Decision-Making 22
Interference of Two-Position Controllers 24
1954 Show Report 30

Electrical Interference in Instrumentation -- Its Causes and Remedies -- Part I 49
Concepts in Measurement 51

DECEMBER 1954
Frequency Response Analysis of a Flow-Control System . 11
Analog to Digital Converters 15
Installation and Maintenance of Flow Meters 20
Apparatus for Determining the Settling Rates of Slurries 24
Continuous Measurement of Ketchup Viscosity in the Finishing Kettle 27
Instrumentation for Automobile Crash Injury Research . 29
Electrical Interference in Instrumentation -- Its Causes and Remedies -- Part II 32

JANUARY 1955
Satisfied? -- Watch Out! 1
A Forecast for 1955 3
Instrumentation Paces Automation 4
Automation Growing 6
Optimizing Control of a Distillation Column 7
The Need for and Creation of Mechanized Data in Production Recording 12
Applications of Radioactive Density Gaging to Process Measurement and Control 16
The Compression Hygrometer: Application of a New Technique for the Measurement of Relative Humidity . 22
A Level System for Paper Stock or Slurry 25
Poidometer for Control of Granular Material 26
Calculating Restriction Orifices for Liquids 28

FEBRUARY 1955
Influence of Automatic Control on Plant Design in the Petroleum Industry 39
The Instrument Industry -- From Where to Where? 40
Computers at Oak Ridge 42
Adequate Safety Interlock and Alarm Systems for Chemical Processes 45
A Quick Response Variable Flow Control Device 48
Instrumentation of a High-Pressure Supersonic Wind Tunnel 52
Self-Cleaning Antimony pH Electrode 55
A Pneumatic Test Panel for Performing Frequency Response Tests 57

MARCH 1955
Cooperation Key to Our Future 71
High Speed Computers 73
The Present Status of High Pressure Measurement and Control 77
Accelerated Fatigue Testing 80

Miniaturization of Transducers for Mobile Applications 81
Concept and Practice of Coordinated Control Systems . . 86
Solution Concentration Controller 87
Testing Fluorescent Lamps with Vector-Sum Ammeter . . . 89

APRIL 1955
Hardware Progress and Human Progress 101
Design of Automatic Time and Sequence Control Systems for Processes 102
Strain Gages -- Part One 107
Probe for Steam Temperature Measurements 108
The Present Status of High Pressure Measurement and Control -- Part Two 109
Mach Number and True Air Speed Measurement 114
Cross-Check System for EMF and Resistance Standards in a Meter Laboratory -- Part One 117
Education in Automatic Control Engineering 120
Fundamental Analysis of Control Systems 123

MAY 1955
Automation Presents a Challenge 139
Exploiting the Displacement Level Principle 141
The Synchro Timer and Its Applications to Material Handling and Sorting Operations 145
Design of Automatic Time and Sequence Control Systems for Processes 150
Automatic Intelligence Gathering Systems 154
The Measurement of Flow with Density Compensation as Applied to Liquids and Gases 159
Adjustable Voltage Stabilizer 162
Cross-Check System for EMF and Resistance Standards in a Meter Laboratory -- Part Two 163
The Application Factor in Instrument Design 165

JUNE 1955
Pioneers in Automation 183
Designing a Control System for Jet Engine Test Facility 184
The Strange Case of the Round Manhole Covers 187
The Fundamental Principles of Non-Dispersive Infrared Analyzers 189
Correspondence Instruction -- One Solution to Training Programs in Instrumentation 194
A pH Control Problem in Waste Water Treatment 196
Design of Automatic Time and Sequence Control Systems for Processes 199
Methods of Dynamic Analysis 203
A Flow Control Problem 207
Training Process Operators in Instrumentation 208

JULY 1955
Organized Exchange of Information -- the First Step Toward Acceptable Standardization 231
New Fields for Instrument Engineers 232

Control of Surge in Centrifugal Compressors 234
Electronic Instrumentation for Atlantic's Catformer . . 241
Strain Gages -- Part Two 245
Engine Pressure Indicators -- Part One 247
A Method of Comparing Transducers for Instrumentation Application 251
Simple and Inexpensive Pneumatic Leak Detector and Valve Test Unit 255
Spring Materials 257

AUGUST 1955
Dynamics Requires Mathematics 287
International Development of Atomic Energy 288
Engine Pressure Indicators -- Part Two 291
Instrumentation on an Ethylene Plant 295
A Two-Variable Computer for a Continuous Indicating Recording Psychrometer 298
Application of Analogs to Dynamic Analysis 301
A Variable Ratio Relay for Closed Loop Blending Systems 303

SEPTEMBER 1955
Engineers Can Write 57A
Instrumentation Paces Automation 327
Automatization 328
Selecting Control Valve Trim for High Pressure Drop and Erosive Service 332
Thermocouple Measurements in an rf Field 338
Analog Measurement and Conversion to Digits 341
Automatic Control of Machine Tools at Thompson Products Jet Division 346
Engine Pressure Indicators -- Part Three 348
Application of Some Systems Engineering Principles to Design of a Fuel-Supply System 352
Regulator Analysis 361
Some VHF Bridge Applications 363

OCTOBER 1955
Machines Are Made, not Born 447
Maintenance Procedures for Analytical Instrumentation . 451
Factors in Selecting of Process Instrumentation for Control Panels 453
An Historical Record of the Instrument Society of America -- Part One 456
Engine Pressure Indicators -- Part Four 458
Basic Problems in the Viscosity of Non-Newtonian Fluids 462
A Practical Technique for Reducing Pressure Transmission Distortion 467
Precision in a Meter Checking Program -- Part One . . . 469

NOVEMBER 1955
Are You Among the Shock Casualties? 485
Automation -- Friend or Foe 488
Centralized Control of a Complex Products Pipe Line System 489

Special vs Square Root Flow Meter Calibration 494
Engine Pressure Indicators -- Part Five 497
A Method of Telemetering Temperature Data 502
An Historical Record of the Instrument Society of America -- Part Two 505
Analysis of a Second Order System 509
Precision in a Meter Checking Program -- Part Two . . . 513

DECEMBER 1955
The White House Conference on Education 535
Dynamic Analysis and Control of a Process Pump 536
Controlled Volume Pumping 540
Power Plant Flow Metering 545
Engine Pressure Indicators -- Part Six 548
An Historical Record of the Instrument Society of America -- Part Three 553
The Dew Point Story 556
Precision in a Meter Checking Program -- Part Three . . 560

JANUARY 1956
Trends Predict 1956 to be Best Year 1
Natural Gasoline Plant Instrumentation 2
Typical Overall Costs of Pneumatic Control Systems . . 6
Basic Principles of Link and Lever Adjustment 10
The Functional Considerations for a Low Cost Electronic Analog Computer 13
Transfer Functions Applied to Process Contral Dynamics 18
A New Type Displacement Transducer 21
Design Features in the Nation's First Nuclear Power Plant 23
History of the ISA -- Part Four 26

FEBRUARY 1956
What's the Direction of Your Automatic Control Policy? 39
Instrumentation for the Process Industries -- Pneumatic or Electronic 40
Flow Calculations for Flat Plate Orifices 46
New Horizons in Chemical Analysis Instrumentation . . . 52
An Eight Decade Logarithmic Ohmeter 54
Natural Gasoline Plant Instrumentation -- Part Two . . 57
Installation and Maintenance of Electronic Control Systems 61
Protective Packaging for Precision Instruments 64
History of the ISA -- Part Five 66

MARCH 1956
Who's Got the Facts? 75
Applying Statistics to Instrumentation Problems 76
Application of Electronic Control Systems 86
Comparisons of rf and Magnetic Mass Spectrometry . . . 89
Magnetic Amplifiers in Instrumentation 93
Natural Gasoline Plant Instrumentation -- Part Three . 97

History of the ISA -- Part Six 100
Automation is Not New to the Steel Industry 60A

APRIL 1956
Approaching a Common Problem 111
The Direct Analogy Electric Analog Computer 112
A New Circuit for Amplitude Comparison 119
A Coaxial-Cylinder Viscometer for Non-Newtonian Fluids 124
History of the ISA -- Part Seven -- Conclusion 129
A Practical Application of Transient Response Techniques to Process Control Systems Analysis . . . 134
Considering Today's Problems in Instrumentation 140

MAY 1956
Trends in Data Processing 8A
A Change of Pace 149
Atomic Reactors 150
Electrical Analogies for Mechanical Structures 161
Metering of Interplant Flows 168
Frequency Response Analysis 170

JUNE 1956
Opportunities Unlimited 183
Instrumentation for a 'Plug-In' Process 184
Factors in Selecting Data Handling Systems 188
New Centralized Instrument Department at Gulf's Port Arthur Refinery 192
Mechanical-Electronic Transducer for Low Range Pressure and Force 194
Designing a Simulated Rate of Climb Indicator 197
Designing Analogy Circuits from Test Data 201

JULY 1956
No Man's Land 217
A New Approach in Process Control System Design 218
New Apparatus for Friction Measurement 224
How Much Instrument Maintenance? 229
Instrument Courses in U.S. Colleges 234
External Strain-Gage Instrumentation at Transient Elevated Temperatures 236
A Versatile Closure for High Pressure Vessels Utilizing O-Rings for the Initial Seal 241

AUGUST 1956
Dynamics of Specifications 259
Design & Performance of a Thrust Transducer 260
Maintenance Tips for Electronic Self-Balancing Potentiometers & Bridges 265
Putting the Analog Computer to Work 270
Mathematical Description of the Gas Flow Processes for Control Purposes 274
Humidity Control Aids Bomber Instrument Testing 281
CIPP Progress Reports 282

SEPTEMBER 1956
The SAMA Story 22A
Automation 295
Education for Automation -- A Major Challenge 296
11th Annual ISA Instrument -- Automation Conference & Exhibit Program Index Page 331
The IGY Earth Satellite Program 298
Factors in Selecting Valve Actuators for Electronic Control Systems 302
Making a Success of Analytical Control Installations . 310
Preventive Maintenance for Process Instrumentation Pays Off 314
Safety and Electronic Control Systems 318
Control Valve Requirements for Gas Flow Systems 323

OCTOBER 1956
Impact! 405
Effect of Automation on Society 406
Instrumentation in Scientific Research 408
Frequency Response Analysis of a Fractionating Column . 412
Increasing Reliability of Industrial Data Systems . . . 417
Flexible Temperature Control by Use of Portable Controllers and Plug-in Connections 422
Synthesis of Gas Flow Control Systems 426

NOVEMBER 1956
Automation and Economic Stabilization 14A
Obsolescence 439
Gas Chromatography in Plant Streams 440
Training College Graduates for Engineering Work in an Instrument Company 445
For Sale: A Package of Total Measurements Service . . 450
Operational Design of Gas Flow Control Systems 454
Dynamic Analysis of a Composition Control Problem . . . 459
New York ISA Show Report 464

DECEMBER 1956
Key to Progress and Prosperity 12A
Hardware or Performance? 481
Frequency Response of Pneumatic Transmission Lines . . 482
A Before and After Look at Data Logging 486
Continuous Analysis of Argon for Traces of Nitrogen . . 490
Industrial Weighing with Load Cells 492
Selecting Facilities and Standards for a Total Measurements Service 496
Installation and Operation of a Flow Control System . . 499

JANUARY 1957
Russia Pushes for Technical Supremacy 14A
It's Your Problem Too! 1
America Has a Challenge, A Special Staff Report 2

Analog Computer Simulation of a Chemical Reactor . . . 14
Bridging the Gap to the Automatic Factory 19
Instrument Department Organization in Processing Plants 22
New Developments in Continuous Chemical Analysis by Optical Methods 26
New Ideas in Instrumentation Contest Winners 31

FEBRUARY 1957
Management Mistakes in Automation 17A
A New Order of Management 41
Management Planning for Automation 42
Training for Electronics Maintenance 49
Nuclear Power Reactor Instrumentation and Control . . . 54
GM Proving-Ground Instrumentation 60
Computers for Business and Management 62
The Logic of V-Brush Analog-to-Digital Converters . . . 66
New Ideas in Instrumentation Contest Winner 70

MARCH 1957
One-Hundred-Fifty Years of Measuring Instrument Progress 16A
To Better Serve You 81
Operational Electronic Analog Computers 82
A Check List for Successful Instrument Design 89
Sizing Valves for Flashing Fluids 92
Computers for Business and Management 98
The Cost of Pneumatic Control Systems 102
New Ideas in Instrumentation Contest Winners 107

APRIL 1957
Government Instrument Research Data Available to Industry 16A
Public Disinterest in Science 117
Improving the Infrared Gas Analyzer 118
Instrumentation for Low-Temperature Automotive Testing 124
A Precision Gas Mixer for Calibrating Analyzers 128
The Effects of Hysteresis on Derivative Control 136
Operational Electronic Analog Computers 141
Digital Readout for Wind-Tunnel Data 145

MAY 1957
Instrumentation in Nuclear Industries 16A
Power Unlimited! 161
Measurement of Gamma Radiation in the Human Body . . . 162
Introducing Management to Data Logging 166
Measurement of Detonation-Wave Velocities 170
Putting the X-Ray Spectrograph into the Process Control Loop 174
The Meaning of Engineer's Registration 178
Trouble Shooting Electronic Control Systems 180
Pressure Control of Light-Ends Fractionators 185
A Foundation for Our Field 190

JUNE 1957
What Price Electronic Reliability? 16A
Looking Ahead 205
Instrumentation and Control of the Oak Ridge Research Reactor 206
Exploiting the Mass Spectrometer 212
Magnification Change in Schlieren Systems 216
How to Specify Thermocouple Response 219
Real-Time Analysis of Flight-Test Data 226
Dynamic Analysis of Heat Exchanger Control 230
Instrument Operation and Maintenance in Atomic Energy Plants 236
Foundation Feedback 241
Twelve Years of ISA Growth 242

JULY 1957
The Astonishing Computers 16A
IGY -- Man's Greatest Exploration! 259
Instrumentation of the Chemical Plant for the Oak Ridge Homogenous Reactor 260
Infrared Analyzers for In-Plant Process Control 267
How to Select Flowmeters 272
Made in Japan Has a New Meaning 275
Operating Principles of Hydraulic Relays 276
Organizing and Training Instrument Personnel 282
Automation of Environmental Testing 286
Who Qualifies as a Professional Engineer 290
Foundation Feedback 296

AUGUST 1957
The Engineer's Contribution to Economic Progress . . . 14A
Semiconductors -- Little Giants! 311
IR Solutions to Five Process Problems 312
British I-E-A Exhibit 317
Transistorizing a Power Supply for Telemeters 318
Nondestructive Testing of Nuclear Reactor Components . 322
Electric Actuators: Examination and Evaluation 326
Using Hydraulic Relays in Process Control 334
Initial Missile Data Via Drag Cable 338
Control Valve Maintenance 340
Foundation Feedback 345

SEPTEMBER 1957
Automation Behind the Iron Curtain 22A
How to Apply for Professional License 67A
Systems Engineering 361
How to Solve Analyzer Control Problems 363
A Simulator for Nuclear Reactor Operator Training . . . 369
Wide Range Compensation of Steam Flowmeters 374
Instrumentation of IGY 378
Maintaining and Trouble-Shooting Continuous Infrared Analyzers 385
Instrumentation for Solution -- Loop Experiments Inside a Nuclear Pile 390

ISA Standards and Practices for the Instrument Industry 394
Foundation Feedback 396
National Committees 432
Section Officers 435
President's Annual Report for 1957 439
Treasurer's Annual Report for 1957 443
Our Job Ahead 446

OCTOBER 1957
Your Rate of Change 453
First Computer-Controller Power System 454
A Pneumatic Analog for Testing and Teaching 459
West German Instrument Industry Moves Ahead 464
Labor and Automation 468
A Continuous Titrator Controller for Chemical Process Slurries 472
Radio-Frequency Analyzers for Laboratory and Plant . . 474
Telemetering for Interplanetary Flight 478
Foundation Feedback 481

NOVEMBER 1957
Technology and People 16A
Reflections from the New Moon 495
Control System of the Ford Nuclear Reactor 496
How to Increase Tube Life in Electronic Instruments . . 502
Machine Computation of Gas Compressor Load Curves . . . 507
How to Prepare for Registration Exams 510
The Development of Gas Chromatographs 514
Foundation Feedback 518
Cleveland ISA Show Report 520
Section Meeting Schedule & Programs 544

DECEMBER 1957
Instrumentation Is Automatic Control 12A
Feedback from Engineers 547
The Computer-Team Approach to Control-System Design . . 548
Past, Present and Future of Gas Chromatography 563
How to Measure Liquid Interface Levels 554
Electrical Meters Can Do Math, Too! 558
Infrared Headed League 567
Debugging Data-Handling Systems 570
Japanese Study Team Report 575
New Ideas in Instrumentation Contest Winners 576
Foundation Feedback 577
Training the Instrument Sales Engineer 579

JANUARY 1958
Moving Day for Your Engineering License 18
Economics of Process Control 22
Mediocrity 45
Instrumentation of a PWR Atomic Power Plant 46
Let a Recorder Solve It 52

Predicting Process Control Performance with Computers . 54
How to Measure Liquid Interface Levels 60
NMR-A New Tool For Moisture Analysis 64
INTERKAMA 69

FEBRUARY 1958
Better Plants From Better Data 23
Fast Checkout of Electronic Components 30
Our New Face 35
TALOS-An Automated Missile System 36
Modern Industrial X-Ray Instrumentation 40
Survey Reveals Most Popular Analyzer Types 46
Panel Design by Pin Up 48
Three Barrels Per Second 54
Common Troubles with Head Flowmeters 58
What Part Salesman -- What Part Engineer? 62
UNILOG -- A Continuous Rate Computer 63
1958 -- How Good For Engineers? 65
Push-Button Steel 66

MARCH 1958
Spectrometer Spots Oil and Gas 23
Ethics in Professional Engineering 26
Paradox of Centralized Control 35
Pneumatic Variable-Speed Pump Control 36
Could You Use a Tape-Loop Memory? 40
More Accurate Thermocouples with Percussion Welding . . 42
A Valve Operator for Unattended Locations 48
The Biggest Instrument Ever Built 52
Keeping Your Analyzers on Steam 54
Chronistat Clocks Your Phono Needle 59
Tester Checks Thermocouples without Flames 59
How Sales Engineers Contribute to the Instrument Industry 61

APRIL 1958
Union Leader Asks Automation Curbs 14
Centralized Control for Heat Treating 20
The Weakest Link 31
Designing Control Loops from Frequency Response Data . 32
A Strain-Gage Transducer for Bourdon Tubes 37
A New Approach to Analog-Digital Conversion 42
Good Records -- Key to Successful Maintenance 45
The Lowly Electrical Connection 49
Inertia -- Electronically 52
How ISA Helps the Sales Engineer 55
Instrument Course in Pittsburgh High School 56
Velocity Servo-Integrator 60
Detector Warns of Pipeline Leaks 60

MAY 1958
Let's Try Dynamics -- For Process Design 12
Automation Mistake May Doom World 31

US Steel Puts Oxygen Analyzer into Closed-Loop Combustion Control 32
Instrumenting the Combustion Process for Removing H2O from Water 37
A Modern Maintenance Program for Process Instrumentation 38
Effects of Limiting Error in Feedback Analysis 44
College Summer Short-Course and Symposia Roundup . . . 50
Electronics Operates Valves 2.5 Miles Away 76

JUNE 1958
Tester Checks 1600 Tubes Per Hour 18
Engineering Education -- Post Sputnik 26
Problems in Instrumentation Growth 37
Nuclear Process Instrumentation -- A Review 38
Continuous Analysis in Nuclear Processing 39
Monitors for Nuclear Reaction Fission Products 43
Pressure Measurement in Molten Metals 47
Instrumenting the PAR Slurry Test Loop 50
Control Valves for Homogeneous Reactors 54
Trouble Shooting Pneumatic Control Systems 60
Meet the Average Instrument Sales Engineer 66

JULY 1958
AEC Needs New Instruments 14
Computer Checks Out pH Control Before Plant Is Built . 24
The Weakest Link 31
Central Station Control -- Today and Tomorrow 32
Radiotracer Instrumentation Solves Tough Process Problems 38
Airborne Recorder and Computer Speed Flight-Test Data Processing 44
Will You Be Able to Service Tomorrow's Instruments? . . 49
pH Controls Up Output and Lower Costs in Nitrate Processing 52

AUGUST 1958
More Miles of Railroad Per Dispatcher 22
Teachers' Pay -- USSR vs USA 25
Oak Ridge Gaseous Diffusion Plant Reports on 15 Years of Process Mass Spectrometry 26
New Explosive-Mixture Detector Safeguards Engine Tests 31
The Versatile Galvanometer 36
Improving the Dynamics of Pneumatic Positioners 38

IR Analyzer Paces Efficiency of Ammonia Reaction . . . 74

NOVEMBER 1958
Instrumentation for the Better Life 24
Instruments Behind the Big Shoots 44
Closing the Gap 49
Introductory Statements -- Missile Instrumentation . . 50
Instrumentation Aspects of Inertial Guidance 54
Laboratory Studies of Missile Re-Entry Aero-Thermodynamics 62
Shock-Tube Research in Hypersonic Aerodynamics 72
Pressure Transducers for Missile Testing and Control . 81
Evolution of Test-Range Instrumentation 85
Measurements of Rocket Exhaust-Gas Temperatures 91
Calibration of High-Frequency-Response Pressure Transducers 98
Magnetic Tape Storage of Telemetry Data 104
Optical Instrumentation -- Obsolescence or Revival? . . 107
Philadelphia ISA Show Report 118

DECEMBER 1958
Instrument Education in the Space Age 16
Defense: A Means -- Not An End 25
Real-Time Airborne Digital Computers 26
The Stepping Switch: Key to Sequential Process Control 33
Two-Color Pyrometry in the Steel Industry 36
IR Analyzer Solves Leak Detection Problems 44
Preventative Maintenance Will Keep Your P/D Meters Running 48

JANUARY 1959
He Who Hesitates Is Lost 37
Systems Engineering Is Here to Stay 38
Design of a pH Control System by Analog Simulation . . 42
How to Plan Computer Control 51
Electronic Flow Control 58
Evaluating Process Instruments 64
Optimizing Refinery Operations with a Digital Computer 66
Trouble-Shooting Hydraulic Control Systems 70
The Swing to Electronic Control 74

FEBRUARY 1959
The Cross-Over Point 27
A Controller to Overcome Dead Time 28
How Much More Will Fully-Automatic Flight-Test Instrumentation Cost You? 36
Precise Measurement of Process Temperature Differences 39
Integral Accuracy Electronic Instruments 42
Purifying Instrument Mercury 47
New Strain Gages for the Space Age 50
Directory of ISA Officers, Committees, and Sections . . 52

MARCH 1959
The Instrument Engineer as a Businessman 14
Can You Define Instrumentation? 33
Putting the Refractometer into Closed-Loop Control . . 34
Metal Joining in Instrument Repair 39
Digital Telemetering Chosen for Remote Pumping Control 44
How Soviet Instrumentation Operates 48
Analysis of On-Off Control by the Describing-Function Method 50
A Low-Impedance Crystal Transducer 55
Calibrating Vibration-Pickup Calibrators 58

APRIL 1959
Where Does Management Stand in Instrumentation 12
Production and Employment 33
Automatic Stream Analysis by Colorimetry 34
Instrumentation: Key to Automatic Deionization 39
Time-Proportioning Electric Control for Pneumatic Signals 43
X-15 -- First Manned Probe into Outer Space 44
Airborne Magnetic Tape -- Ideal for Flight-Loads Testing 46
Metal Joining in Instrument Repair 51
Three Ways to Use Computers in Process Control 56

MAY 1959
Your Russian Competitor 24
How Much Computer Control? 53
Characteristics and Uses of Turbine Flowmeters 54
Gas Chromatography Improves Distillation Operation by 18 percent 60

Optimizing Instrument Maintenance 66
Controls Guarantee Soot-Blowing Priority with Maximum Economy 70
Automatic Control of Ingot Weights 72
Developing a Nomogram for Differential Temperatures . . 75
Airborne Magnetic Tape -- Ideal for Flight Loads Testing 78
ISAJ College Summer Short-Course and Symposium Roundup 82

JUNE 1959
Why We Must Automate 12
Maintenance Goes Modern 33
Computer Control of Distillation Reflux 34
Electromechanical Choppers 42
Special Thermocouple Solves Surface-Temperature Problem 47
Soviet Instrumentation from Inside 50
Instrument Department Becomes Part of Plant Operations 52
Better Seaplanes through Photographic Instrumentation . 58
Instrumentation's Stake in the Clouds 63

JULY 1959
Outlook for Computer Control 18
What's Ahead for Computer Control 45
Status of Process Computer Control 46
Process Computer Control Concepts 47
Available Computers and What They Do 54
Computer Control Installations 66
Developing Mathematical Models for Computer Control . . 70
Optimizing Control by Model Methods 74
Optimizing Control by Automatic Experimentation 78
Glossary of Computer Terms 80
Bibliography of Computer Control 81

AUGUST 1959
Don't Be an Obsolete Instrumentman! 18
Ingenious Engineering 31
